- Git & GitHub

PROFILE

I am a second-year student passionate about problem solving, competitive programming and development. I enjoy creating solutions to problems and have a keen interest in backend. My goal is to enhance my skills in data management and efficient problem-solving techniques.

PROJECTS

AlgoAnims
Team leader

MERN stack, GSAP, Node mailer, Passport.js
Github Repository URL

Managed AlgoAnims pages, an innovative platform for dynamic algorithm visualizations for Data Structures like Stack, Queue, Linked Lists, Graphs, Trees and efficient Searching and Sorting techniques, enhancing user understanding through engaging animations and problem links to solve. Also a profile page where user can see his/her progress in various coding platforms by giving their usernames

Game purchase WebApp
Team leader and Backend developer

PHP, MySQL, HTML, CSS
Github Repository URL

This web app is a platform for selling and renting games. It features secure payment gateway pages integration and a user-friendly interface for browsing and ordering games. An admin portal allows efficient management of game CD stock, orders, and inventory. The app ensures a responsive design for seamless use across devices.

SmartScout
Team mate

Django,Jinja,Tailwind,MySQL
Github Repository URL

It is a smart recruitment and employee management system for companies. Main functionalities are-
Admin can manage all managers of company.
Managers can generate recruitment forms and recruit employees easily by our filtering algorithms and also manage company projects.
Employees can view their current job profile and also apply for any other job.

EXPERIENCES
- I have taken part in Hackathons like DUHacks 3.0 and Smart India Hackathon 2024.
